Available Cybersecurity Funding Opportunities

The Supervisory ICT Risk and Cybersecurity ('SIRC') Function with the Malta Financial Services Authority (the 'Authority'), with a view to contribute towards Authorised Person's digital operational resilience posture, encourages Authorised Persons to apply for relevant funding calls, when available. For instance, the Authority previously released a communication in relation to the Malta Information Technology Agency ('MITA') CYBER+ALT Grant Scheme in 2023, via circular titled [Malta Information Technology Agency – Cybersecurity Projects](#), published by the Authority in October 2023.

In the same vein as the above, the Authority would like to draw Authorised Person's attention to new funding opportunities. More specifically, the National Cybersecurity Coordination Center ('NCC') is promoting several European funding opportunities as part of the Digital European Programme and Horizon Europe. The funding opportunities include support for the implementation of EU legislation on cybersecurity and national cybersecurity strategies.

More information, including deadlines and information on the application process can be found [here](#). Questions should be addressed to the contact point(s) specifically provided under that website.
