Directors' Report

for the year ended 31 December 2023

The Board of Directors is hereby presenting its annual report together with the audited financial statements of the Company for the year ended 31 December 2023.

Directors

The Directors of the Company since the beginning of the year up to the date of this report were:

Mr. Martin Vella Mr. Mark Vella

Principal activity

The Company is principally engaged in renting out of property, carrying the business of finance and holding of immovable property. The Company also acts as a guarantor to the Bond Issue by Hal Mann Vella Group plc.

Review of business

During the year ended 31 December 2023, the Company generated a profit before tax of €943,694 (2022: €949,281).

Given the Company's financing structure and the positive net assets position attained by the Company by the end of the current financial year, the Directors consider the Company's state of affairs as at the close of the financial year to be satisfactory.

Results

The results for the year are set out in the statement of comprehensive income on page 7.

Future Developments

The Directors expect to attain and enhance the company's present level of revenue and continue to register positive results in the coming years.

Dividend

The Board of Directors does not propose a payment of a dividend.

Financial Reporting Framework

The Directors have prepared the Company's financial statements for the year ended 31 December 2023 in accordance with the International Financial Reporting Standards as adopted by the European Union, and the requirements of the Companies Act, Cap 386 of the Laws of Malta.

Auditors

A resolution to re-appoint HLB CA Falzon as auditors of the Company will be proposed at the forthcoming annual general meeting. HLB CA Falzon have expressed their willingness to continue in office.

Mr. Mark Vella - Director

By order of the Bard:

Mr. Martin Vella - Director

Registered Office

Hal Mann Vella, The Factory, Mosta Road, Lija LJA 9016

28 March 2024

Statement of Directors' Responsibilities

The Companies Act, Cap. 386 of the Laws of Malta requires the Directors of Sudvel Limited to prepare annual financial statements for each financial year which give a true and fair view of the state of affairs of the Company as at the end of the financial year and of the profit or loss of the Company for the year in accordance with the requirements of International Financial Reporting Standards as adopted by the European Union.

In preparing such financial statements, the Directors are required to:

- adopt the going concern basis unless it is inappropriate to presume that the Company will continue in business;
- select suitable accounting policies and apply them consistently from one accounting year to another;
- make judgments and estimates that are reasonable and prudent; and
- account for income and charges relating to the accounting year on the accruals basis.

The Directors are responsible for keeping proper accounting records which disclose with reasonable accuracy at any time, the financial position of the Company and to enable them to ensure that the financial statements have been properly prepared in accordance with the provisions of the Companies Act, Cap. 386 of the Laws of Malta.

The Directors are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Independent Auditors' Report to the members of Sudvel Limited

Report on the Audit of the Financial Statements

Opinion

We have audited the accompanying financial statements of Sudvel Limited ('the Company'), set out on pages 7 to 39, which comprise the statement of financial position as at 31 December 2023, and the statement of profit or loss and other comprehensive income, statement of changes in equity and the statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Company as at 31 December 2023, and of its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted by the European Union and have been properly prepared in accordance with the requirements of the Companies Act, Cap 386, Laws of Malta.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code), together with the ethical requirements that are relevant to our audit of the financial statements in accordance with the Accountancy Profession (Code of Ethics for Warrant Holders) Directive issued in terms of the Accountancy Profession Act (Cap.281) in Malta, and we have fulfilled our other ethical responsibilities in accordance with the IESBA code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

The Directors are responsible for the other information. The other information comprises of the Directors' Report, but does not include the financial statements and our Auditors' Report thereon.

Our opinion on the financial statements does not cover this information, including the Directors' Report.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

Independent Auditors' Report to the members of Sudvel Limited

With respect to the Directors' Report, we also considered whether the Directors' Report includes the disclosures required by Article 177 of the Companies Act, Cap 386 of the Laws of Malta. Based on the work we have performed, in our opinion:

- the information given in the Directors' Report for the year ended 31 December 2023 is consistent with the financial statements; and
- the Directors' Report has been prepared in accordance with the Companies Act (Cap.386)

In addition, in light of the knowledge and understanding of the Company and its environment, obtained in the course of the audit, we are required to report if we have identified material misstatements in the Directors' Report.

Based on the work we have performed, we have nothing to report in this regard.

Responsibilities of the Directors and Those Charged with Governance

The Directors are responsible for the preparation of the financial statements that give a true and fair view in accordance with the International Financial Reporting Standards as adopted by the European Union, and for such internal controls as the Directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Company or to cease operations, or have no realistic alternative to do so. Misstatements can arise from fraud or error and are considered material if, individual or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

Independent Auditors' Report to the members of Sudvel Limited

- Identify and assess the risk of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional ommissions, misrepresentations or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our Auditors' Report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our Auditors' Report. However, future events or conditions may cause the Company to cease to continue as a going concern. In particular, it is difficult to evaluate all of the implications that the geopolitical conflict between Russia and Ukraine will have on the Company's trade, customers and suppliers, and the disruption to the business and the overall economy.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be throught to bear on our independence, and where applicable, related safeguards.

Independent Auditors' Report to the members of Sudvel Limited

Report on other legal and regulatory requirements

Under the Companies Act, Cap 386 of the Laws of Malta, we are required to report to you if, in our opinion:

- we have not obtained all the information and explanations which, to the best of our knowledge and belief, were necessary for the purpose of our audit;
- proper books of account have not been kept by the Company so far as appears from our examination thereof;
- the Company's financial statements are not in agreement with the books of account;
- if certain disclosures of directors' remuneration specified by law are not made in the financial statements, giving the required particulars in our report;

We have nothing to report to you in respect of these responsibilities.

Notes to the Financial Statements for the year ended 31 December 2023

1. Corporate information

Sudvel Limited is registered in Malta as a limited liability company under the Companies Act, Cap. 386 of the laws of Malta. The Company's registration number is C 35806.

2. Significant accounting policies

2.1 Basis of preparation

The Company's financial statements are prepared under the historical cost convention except for investment property that has been measured at fair value and are in accordance with the requirements of the International Financial Reporting Standards as adopted by the European Union and comply with the Companies Act, Cap. 386 of the Laws of Malta. The financial statements are presented in Euro, which is the Company's functional currency.

Impact of geopolitical tension between Russia and Ukraine

Following the escalation of the geopolitical tensions in Russia and Ukraine from February 2022, the Company has gone through a process of assessing any potential exposures, with no material exposure identified. Whilst, the Company has no direct exposure to these jurisdictions, management will continue to monitor the situation, particularly in terms of the wider macroeconomic implications.

There were no other material events affecting the Company which occurred after the reporting date.

2.2 Current versus non-current classification

The Company presents assets and liabilities in the statement of financial position based on current/non-current classification. An asset is current when it is:

- Expected to be realised or intended to be sold or consumed in the normal operating cycle;
- Held primarily for the purpose of trading;
- Expected to be realised within twelve months after the reporting date; or
- Cash and cash equivalents unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting date.

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in the normal operating cycle;
- It is held primarily for the purpose of trading;
- It is due to be settled within twelve months after the reporting date; or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting date.

The Company classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

Notes to the Financial Statements for the year ended 31 December 2023

2.3 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets

Initial recognition and measurement

Financial assets are classified, at initial recognition, as financial assets measured at amortized cost, fair value through profit or loss (FVTPL) and fair value through other comprehensive income (FVOCI). All financial assets are recognized initially at fair value plus, in the case of financial assets not recorded at FVTPL, transaction costs that are attributable to the acquisition of the financial asset.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Company's business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which the Company has applied the practical expedient, the Company initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs. Trade receivables that do not contain a significant financing component or for which the Company has applied the practical expedient are measured at the transaction price determined under IFRS 15.

In order for a financial asset to be classified and measured at amortised cost or FVOCI, it needs to give rise to cash flows that are 'solely payments of principal and interest (SPPI)' on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level. Financial assets with cash flows that are not SPPI are classified and measured at fair value through profit or loss, irrespective of the business model.

The Company's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

Subsequent measurement

For purposes of subsequent measurement, financial assets in these financial statements are classified in four categories:

- financial assets at amortised cost (debt instruments)
- financial assets at FVOCI with recycling of cumulative gains and losses (debt instruments)
- financial assets designated at FVOCI with no recycling of cumulative gains and losses upon derecognition (equity instruments)
- financial assets at FVTPL

Notes to the Financial Statements for the year ended 31 December 2023

Financial assets at amortised cost

Financial assets at amortised cost are subsequently measured using the effective interest (EIR) method and are subject to impairment. Gains and losses are recognised in profit or loss when the asset is derecognised, modified or impaired.

The Company's financial assets at amortised cost includes trade receivables, and receivables from related companies which are included under current financial assets.

Financial assets at FVOCI (debt instruments)

For debt instruments at FVOCI, interest income, foreign exchange revaluation and impairment losses or reversals are recognised in the statement of profit or loss and computed in the same manner as for financial assets measured at amortised cost. The remaining fair value changes are recognised in OCI. Upon derecognition, the cumulative fair value change recognised in OCI is recycled to profit or loss.

As at 31 December 2023 and 2022, the Company has no debt instruments at FVOCI.

Financial assets designated at FVOCI (equity instruments)

Upon initial recognition, the Company can elect to classify irrevocably its equity investments as equity instruments designated at FVOCI when they meet the definition of equity under IAS 32 Financial Instruments: Presentation and are not held for trading. The classification is determined on an instrument-by-instrument basis.

Gains and losses on these financial assets are never recycled to profit or loss. Dividends are recognised as other income in the statement of profit or loss when the right of payment has been established, except when the Company benefits from such proceeds as a recovery of part of the cost of the financial asset, in which case, such gains are recorded in OCI. Equity instruments designated at FVOCI are not subject to impairment assessment.

As at 31 December 2023 and 2022, the Company has no equity instruments at FVOCI.

Financial assets at FVTPL

Financial assets at FVTPL are carried in the statement of financial position at fair value with net changes in fair value recognised in the statement of profit or loss.

This category includes derivative instruments and listed equity investments which the Company had not irrevocably elected to classify at FVOCI. Dividends on listed equity investments are recognised as other income in the statement of profit or loss when the right of payment has been established.

A derivative embedded in a hybrid contract, with a financial liability or non-financial host, is separated from the host and accounted for as a separate derivative if: the economic characteristics and risks are not closely related to the host; a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative; and the hybrid contract is not measured at fair value through profit or loss. Embedded derivatives are measured at fair value with changes in fair value recognised in profit or loss. Reassessment only occurs if there is either a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required or a reclassification of a financial asset out of the fair value through profit or loss category.

Notes to the Financial Statements for the year ended 31 December 2023

Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a Group of similar financial assets) is primarily derecognised (i.e., removed from the Company's statement of financial position) when:

- the rights to receive cash flows from the asset have expired; or
- the Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if, and to what extent, it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of its continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Impairment of financial assets

Further disclosures relating to impairment of financial assets are also provided in notes to the financial statements.

The Company recognises an allowance for expected credit losses (ECLs) for all debt instruments not held at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Company expects to receive, discounted at an approximation of the original effective interest rate.

ECLs are recognised in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12-months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL).

For cash in banks and trade and other receivables, the Company applies a general approach in calculating ECLs. Therefore, the Company tracks changes in credit risk, and recognises a loss allowance based on either 12-month ECLs or lifetime ECLs, depending on whether there has been a significant increase in credit risk on the financial instrument since initial recognition. This is being done by considering the change in the risk of default occurring over the remaining life of the financial instrument.

Notes to the Financial Statements for the year ended 31 December 2023

The following are the key elements in the calculation of ECLs:

a. Probability of Default (PD) The PD is an estimate of the likelihood of default over a given

time horizon. A default may only happen at a certain time over the assessed period, if the financial asset has not been previously derecognised.

b. Exposure at Default (EAD) The EAD is an estimate of the exposure at a future default

date, taking into account expected changes in the exposure

after the reporting date.

c. Loss Given Default (LGD) The LGD is an estimate of the loss arising in the case where a

default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the

lender would expect to receive.

The mechanics of the ECL method are summarised below:

Stage 1: The 12-month ECL is calculated as the portion of lifetime ECL

that represent the ECL that result from default events on a financial instrument that are possible within the 12 months after the reporting date. The Company calculates the 12-month ECL allowance based on the expectation of a default occurring in the 12 months following the reporting date. These expected 12-month default probabilities are applied to

a forecast EAD and multiplied by the expected LGD.

Stage 2: When a financial asset has shown a significant increase in

credit risk since origination, the Company records an allowance for the lifetime ECL. The mechanics are similar to those explained above, but PDs and LGDs are estimated over

the lifetime of the instrument.

Stage 3: For financial asset considered as credit-impaired, the

Company recognises the lifetime ECL. The method is similar to that for Stage 2 financial assets, with the PD set at 100%.

The Company considers a financial asset in default when contractual payments are 90 days past due. However, in certain cases, the Company may also consider a financial asset to be in default when internal or external information indicates that the Company is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Company. A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition as loans or borrowings or as payables, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts.

Notes to the Financial Statements for the year ended 31 December 2023

Subsequent measurement

For purposes of subsequent measurement, financial liabilities are classified in two categories:

- financial liabilities at FVTPL
- financial liabilities at amortised cost (loans and borrowings)

Financial liabilities at FVTPL

Financial liabilities at FVTPL include financial liabilities held for trading and financial liabilities designated upon initial recognition as at FVTPL.

Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the Company that are not designated as hedging instruments in hedge relationships as defined by IFRS 9. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments.

Gains or losses on liabilities held for trading are recognised in the statement of profit or loss. Financial liabilities designated upon initial recognition at FVTPL are designated at the initial date of recognition, and only if the criteria in IFRS 9 are satisfied. The Company has not designated any financial liability as at FVTPL.

Financial liabilities at amortised cost (loans and borrowings)

This is the category most relevant to the Company. After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit or loss.

This category generally applies to interest-bearing loans and borrowings. For more information, refer to note 11 to the financial statements.

Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

Notes to the Financial Statements for the year ended 31 December 2023

2.4 Investment property

Property that is held for long-term rental yields or for capital appreciation or both, and is not occupied by the Company, is classified as investment property. Investment property comprises freehold and leasehold land and buildings held under long-term operating leases.

Investment property is measured initially at its historical cost, including related transaction costs and borrowing costs. Historical cost includes expenditure that is directly attributable to the acquisition of the items. Borrowing costs which are incurred for the purpose of acquiring or constructing a qualifying investment property are capitalised as part of its cost. Borrowing costs are capitalised while acquisition or construction is actively underway. Capitalisation of borrowing costs is ceased once the asset is substantially complete and is suspended. After initial recognition, investment property is carried at fair value representing open market value determined periodically. Fair value is based on active market prices, adjusted, if necessary, for any difference in the nature, location or condition of the specific asset. If the information is not available, the Company uses alternative valuation methods such as recent prices on less active markets or discounted cash flow projections.

These valuations are reviewed periodically by professional valuers. Investment property that is being redeveloped for continuing use as investment property or for which the market has become less active continues to be measured at fair value. Fair value measurement on property under construction is only applied if the fair value is considered to be reliably measurable. The fair value of investment property reflects, among other things, rental income from current leases and assumptions about rental income from future leases in the light of current market conditions. The fair value also reflects, on a similar basis, any cash outflows that could be expected in respect of the property.

Professional valuers perform market valuations at least every two years, last revaluation date was as at 30 December 2022 and next revaluation date will be for 31 December 2024.

Subsequent expenditure is capitalised to the asset's carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the Company and the cost of the item can be measured reliably. All other repairs and maintenance costs are charged to the statement of comprehensive income during the financial period in which they are incurred. When part of an investment property is replaced, the carrying amount of the replaced part is derecognised.

The fair value of investment property does not reflect future capital expenditure that will improve or enhance the property and does not reflect the related future benefits from its future expenditure other than those a rational market participant would take into account when determining the value of the property.

Changes in fair value are recognised in profit or loss. Investment properties are derecognised either when they have been disposed of or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal. The difference between the net disposal proceeds and the carrying amount of the asset is recognised in profit or loss in the period of derecognition.

Notes to the Financial Statements for the year ended 31 December 2023

If an investment property becomes owner-occupied, it is reclassified as property, plant and equipment. Its fair value at the date of the reclassification becomes its cost for subsequent accounting purposes. When the Company decides to dispose of an investment property without development, the Company continues to treat the property as an investment property. Similarly, if the Company begins to redevelop an existing investment property for continued future use as investment property, it remains an investment property during the redevelopment.

2.5 Property for resale

Property held for resale is included in the financial statements at the lower of cost and net realisable value. Cost comprises the purchase price of acquiring the property and other costs incurred to develop the property. Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

2.6 Trade and other receivables

Trade receivables are amounts due from lessees in the ordinary course of business. If collection is expected in one year or less, they are classified as current assets. If not, they are presented as non-current assets.

Trade receivables are recognised at fair value and subsequently measured at amortised cost using the effective interest method, less provision for estimated credit losses (ECL's). See note 2.3 for further information on the impairment of these trade receivables.

A specific provision for impairment is established when there is objective evidence that the Company will not be able to collect all amounts due according to the original terms of the receivables. Significant financial difficulties of the debtor or, probability that the debtor will enter bankruptcy or financial reorganisation, and default or delinquency in payments are considered indicators that the receivable is impaired.

The carrying amount of the asset is reduced through the use of an allowance account, and the amount of the loss is recognised in the profit or loss within 'Administrative expense'.

When a trade receivable is uncollectible, it is written off against the allowance account for trade receivables. Subsequent recoveries of amounts previously written off are credited against 'Administrative expense' in the profit or loss.

Prepayments comprise payments made in advance in respect of expenditure relating to the subsequent financial year and accrued income is income relating to the current period, which will not be invoiced until after the end of the current reporting date.

2.7 Cash and cash equivalents

Cash and short-term deposits in the statement of financial position comprise cash at banks and on hand and short-term deposits with a maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cashflows, cash and cash equivalents consist of cash and short-term deposits as defined above, net of outstanding bank overdrafts as they are considered an integral part of the company's cash management.

Notes to the Financial Statements for the year ended 31 December 2023

2.8 Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, from the proceeds.

2.9 Dividend distribution

Dividend distribution to the Company's shareholders is recognised as a liability in the Company's financial statements in the period in which the dividends are approved by the Company's shareholders.

2.10 Trade and other payables

Trade payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Amounts payable are classified as current liabilities if payment is due within one year or less. If not, they are presented as non-current liabilities.

Trade and other payables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method.

2.11 Provisions

Provisions are recognised when the Company has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the amount of the obligation can be made.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to the passage of time is recognised as interest expense.

2.12 Taxation

The tax expense for the period comprises of deferred tax. Tax is recognized in the profit or loss, except when it relates to items recognized in other comprehensive income or directly in equity, in which case it is also dealt with in other comprehensive income or in equity, as appropriate.

Current income tax

Current income tax assets and liabilities for the current period are measured at the amount expected to be recovered or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantially enacted, at the reporting date. Current income tax relating to items recognised directly in equity is recognised in equity and not in the income statement.

Notes to the Financial Statements for the year ended 31 December 2023

Deferred income tax

Deferred tax is provided using the liability method on temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recongised for all temporary differences, except when the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

Deferred tax assets are recognised for all deductible temporary differences, carry forward of unused tax credits and unused tax losses, to the extent probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised, except when the deferred tax asset relating to the deductible temporary differences arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects niether the accounting profit nor taxable profit or loss. The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised.

Unrecognised deferred tax assets are reassessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax against current tax liabilities and the deferred taxes related to the same taxable entity and the same taxation authority.

Value Added Tax

Revenue, expenses and assets are recognised net of Value Added Tax, except:

- where the Value Added Tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case Value Added Tax is recognised as part of the acquisition of the asset or as part of the expense item, as applicable.
- where receivables and payables that are stated with the amount of Value Added Tax included

The net amount of Value Added Tax recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the statement of financial position.

Notes to the Financial Statements for the year ended 31 December 2023

2.13 Leases

The Company assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

The Company as a lessor

Leases in which the Company does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income arising is accounted for on a straight-line basis over the lease terms and is included in revenue in the statement of profit or loss due to its operating nature. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

2.14 Borrowing costs

Borrowing costs which are incurred for the purpose of acquiring or contructing qualifying property, plant and equipment or investment property, are capitalised as part of its cost. Borrowing costs are capitalised while acquisition or construction is actively underway, during the period of time that is required to complete and prepare the asset for its intended used. Capitalisation of borrowing costs is ceased once the asset is substantially complete and is suspended if the development of the asset is suspended. All other borrowing costs are expensed.

2.15 Fair value measurements and valuation processes

The Company measures non-financial assets such as investment property at fair value at each reporting date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between the market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either (a) in the principal market for the asset or liability or (b) in the absence of a principal market, in the most advantageous market for the asset or liability. The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure at fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

Information about the valuation techniques and inputs used in determining the fair value of investment property is disclosed in note 12.

Notes to the Financial Statements for the year ended 31 December 2023

3. Critical accounting estimates and judgements

In preparing the financial statements, the directors are required to make judgements, estimates and assumptions that affect reported income, expenses, assets, liabilities and disclosure of contingent assets and liabilities. Use of available information and application of judgement are inherent in the formation of estimates. Actual results in the future could differ from such estimates and the differences may be material to the financial statements. These estimates are reviewed on a regular basis and if a change is needed, it is accounted in the period the changes become known. The most significant judgements and estimates are as follows:

Fair value of investment property

The Company carries its investment property at fair value, with changes in fair value being recognised in the profit or loss. This is based on market valuations performed by independent professional architects at least every two years. In a year when market valuations are not performed by the independent professional architect, an assessment of the fair value of the investment property consisting of land and building is performed to reflect market conditions at the year-end date.

Market valuation was performed on 30 December 2022 and the Company recognised fair values of investment property (note 12).

Operating lease commitments - Company as lessor

The Company has entered into commercial property leases on its investment properties. The Company has determined, based on an evaluation of the terms and conditions of the arrangements, such as the lease term not constituting a major part of the economic life of the commercial property and the present value of the minimum lease payments not amounting to substantially all of the fair value of the commercial property, that it retains all the significant risks and rewards of ownership of these properties and accounts for the contracts as operating leases.

Recognition of deferred tax assets

The extent to which deferred tax assets can be recognised is based on an assessment of the probability that future taxable income will be available against which the deductible temporary differences and tax loss carry-forward can be utilised. In addition, significant judgement is required in assessing the impact of any legal or economic limits or uncertainties in various tax jurisdictions.

Notes to the Financial Statements for the year ended 31 December 2023

Provision for expected credit losses of trade receivables

The Company uses a provision matrix to calculate ECLs for trade receivables. The provision rates are based on days past due for groupings of various customer segments that have similar loss patterns.

The provision matrix is initially based on the Company's historical observed default rates. The Company will calibrate the matrix to adjust the historical credit loss experience with forward-looking information. For instance, if forecast economic conditions (i.e., gross domestic product) are expected to deteriorate over the next year which can lead to an increased number of defaults in the manufacturing sector, the historical default rates are adjusted. At every reporting date, the historical observed default rates are updated and changes in the forward-looking estimates are analysed.

The assessment of the correlation between historical observed default rates, forecast economic conditions and ECLs is a significant estimate. The amount of ECLs is sensitive to changes in circumstances and of forecast economic conditions. The Company's historical credit loss experience and forecast of economic conditions may also not be representative of customer's actual default in the future. The information about the ECLs on the Company's financial assets is disclosed in notes 12 and 20.

4. Changes in accounting policies and disclosures

4.1 New and amended standards and interpretations

The Company applied for the first time certain standards and amendments, which are effective for annual periods beginning on or after 1 January 2023. The Company has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective.

The nature and the impact of each new standard and amendment is described below:

IFRS 17 Insurance Contracts

This new comprehensive accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure. IFRS 17 replaces IFRS 4 Insurance Contracts. IFRS 17 applies to all types of insurance contracts (i.e., life, non-life, direct insurance and reinsurance), regardless of the type of entities that issue them as well as to certain guarantees and financial instruments with discretionary participation features; a few scope exceptions will apply. The overall objective of IFRS 17 is to provide a comprehensive accounting model for insurance contracts that is more useful and consistent for insurers, covering all relevant accounting aspects. IFRS 17 is based on a general model, supplemented by:

- a) A specific adaptation for contracts with direct participation features (the variable fee approach)
- b) A simplified approach (the premium allocation approach) mainly for short-duration contracts

These amendments had no impact on the financial statements of the Company. The Company intends to use the practical expedients in future periods if they become applicable.

Notes to the Financial Statements for the year ended 31 December 2023

Definition of Accounting Estimates - Amendments to IAS 8

The amendments to IAS 8 clarify the distinction between changes in accounting estimates, changes in accounting policies and the correction of errors. They also clarify how entities use measurement techniques and inputs to develop accounting estimates.

These amendments had no impact on the financial statements of the Company. The Company intends to use the practical expedients in future periods if they become applicable.

Deferred Tax related to Assets and Liabilities arising from a Single Transaction - Amendments to IAS 12

The amendments to IAS 12 Income Tax narrow the scope of the initial recognition exception, so that it no longer applies to transactions that give rise to equal taxable and deductible temporary differences such as leases and decommissioning liabilities.

These amendments had no impact on the financial statements of the Company. The Company intends to use the practical expedients in future periods if they become applicable.

Disclosure of Accounting Policies - Amendments to IAS 1 and IFRS Practice Statement 2

The amendments to IAS 1 and IFRS Practice Statement 2 Making Materiality Judgements provide guidance and examples to help entities apply materiality judgements to accounting policy disclosures. The amendments aim to help entities provide accounting policy disclosures that are more useful by replacing the requirement for entities to disclose their 'significant' accounting policies with a requirement to disclose their 'material' accounting policies and adding guidance on how entities apply the concept of materiality in making decisions about accounting policy disclosures.

These amendments had no impact on the financial statements of the Company. The Company intends to use the practical expedients in future periods if they become applicable.

Notes to the Financial Statements for the year ended 31 December 2023

International Tax Reform – Pillar Two Model Rules – Amendments to IAS 12

The amendments to IAS 12 have been introduced in response to the OECD's BEPS Pillar Two rules and include:

- a) A mandatory temporary exception to the recognition and disclosure of deferred taxes arising from the jurisdictional implementation of the Pillar Two model rules; and
- b) Disclosure requirements for affected entities to help users of the financial statements better understand an entity's exposure to Pillar Two income taxes arising from that legislation, particularly before its effective date.

The mandatory temporary exception – the use of which is required to be disclosed – applies immediately. The remaining disclosure requirements apply for annual reporting periods beginning on or after 1 January 2023,

but not for any interim periods ending on or before 31 December 2023.

These amendments had no impact on the financial statements of the Company. The Company intends to use the practical expedients in future periods if they become applicable.

4.2 Standards issued but not yet effective

The standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Company's financial statements are disclosed below. The Company intends to adopt these standards, if applicable, when they become effective.

Description	Effective for annual periods beginning on or after
Amendment to IFRS16 - Leases on sale and leaseback	1 January 2024
Amendment to IAS 1 - Non-current liabilities with covenants	1 January 2024
Amendment to IAS 7 and IFRS 7 - Supplier finance	1 January 2024
Amendment to IAS 21 - Lack of exchangeability	1 January 2024

Fair value measurement of the Company's investment properties

Market valuations are performed by independent professional architects every two years or earlier whenever their fair values differ materially from their carrying amounts. In the year when a market valuation is not performed, an assessment of the fair value is performed to reflect market conditions at the year-end date.

An independent valuation of the Company's investment property, was performed by independent external valuers having experience in the location and type of property being valued to determine the fair value as at 31 December 2022. The fair value movement was credited to profit or loss and subsequently transferred to other reserves under equity. As at 31 December 2023, management also assessed whether there are any significant changes to the significant inputs of the valuation.

The Company's investment property consists mainly of plots, apartments and land and building for warehouses, offices and parking spaces, with a carrying amount of $\in 28,337,761$ (2022: $\in 28,020,408$). The investment property has been categorised to fall within levels 2 and 3 of the fair value hierarchy. The different levels in the fair value hierarchy have been defined in note 20.

The Company policy is to recognise transfers into and out of fair value hierarchy levels as of date of the event of change in circumstances that caused the transfer. There were no transfers between levels during the year. For all properties, their current use equates to the highest and best use.

Reconciliation of fair value:

	Land	Office properties	Commercial buildings	Residential properties

in profit or loss	21,200	37,264	132,678	14,650
As at 31 December 2022	531,200	2,530,000	24,460,000	705,000
Additions	-	111,561		
As at 31 December 2023	531,200	2,641,561	24,460,000	705,000

Valuation techniques and inputs

The valuation was determined primarily by using the market comparison method for residential properties, and the discounted cash flow method (DCF) for commercial properties.

Notes to the Financial Statements for the year ended 31 December 2023

Comparison method:

Market prices based on database of valuations and of sales of properties in the relevant area.

Discounted cash flow (DCF) method:

Using the DCF method, fair value is estimated using assumptions regarding the benefits and liabilities of ownership over the asset's life including an exit or terminal value. This method involves the projection of a series of cash flows on a real property interest. To this projected cash flow series, a market-derived discount rate is applied to establish the present value of the income stream associated with the asset. The exit yield is normally separately determined and differs from the discount rate.

The duration of the cash flows and the specific timing of inflows and outflows are determined by events such as rent reviews, lease renewal and related re-letting, redevelopment, or refurbishment. The appropriate duration is typically driven by market behaviour that is a characteristic of the class of real property. Periodic cash flow is typically estimated as gross income less vacancy, non-recoverable expenses, collection losses, lease incentives, maintenance cost, agent and commission costs and other operating and management expenses. The series of periodic net operating income, along with an estimate of the terminal value anticipated at the end of the projection period, is then discounted.

Significant increases (decreases) in estimated rental value and rent growth per annum in isolation would result in a significantly higher (lower) fair value of the properties. Significant increases (decreases) in the long-term vacancy rate and discount rate (and exit yield) in isolation would result in a significantly lower (higher) fair value.

Generally, a change in the assumption made for the estimated rental value is accompanied by a directionally similar change in the rent growth per annum and discount rate (and exit yield), and an opposite change in the long term vacancy rate.

Description of valuation techniques used and key inputs to valuation of investment properties:

			Range
	Valuation		(weighted
	technique	Significant inputs	average)
	_		2023
Commercial buildings	DCF	Estimated rental value	7%-7.5%
Office properties	DCF	Estimated rental value	6.5%-7.5%

For the other types of investment properties, the significant inputs used in the fair value measurement are pricing information provided by the independent valuers based on the property size and outlook, location and communal facilities.

32,523	11,791
627,973	535,080
	600,733 - (5,283) - 595,450 32,523

Trade receivables are unsecured, non-interest bearing and are generally on terms of 60 days.

Credit risk of trade receivables which explains how the Company manages and measures the credit quality of trade receivables are disclosed in note 20.

15. Trade and other payables

	2023	2022
	€	€
Current liabilities		
Amount received in advance	442,136	435,106
Trade payables	567,070	505,618
Amout due to group company	-	166,734
Indirect taxes	357,423	120,643
Accruals	471,449	296,706
Total current liabilities	1,838,078	1,524,807

Trade and other payables are unsecured and non-interest bearing.

The amounts owed to group company are unsecured, non-interest bearing and repayable on demand.

The Company's exposure to liquidity risk related to trade and other payables is disclosed in note 20.

Notes to the Financial Statements for the year ended 31 December 2023

16. Deferred taxation

16.1 Deferred tax liability

·	2023 €	2022 €
As at 1 January	(2,319,938)	(2,305,187)
(Charge)/credit in the statement of comprehensive income	(66)	(14,751)
(note 10) As at 31 December	(2,320,004)	(2,319,938)
Tax effect of temporary differences relating to:		
Asset revaluations	(2,320,004)	(2,319,938)
16.2 Deferred tax asset		
	2023	2022
	€	€
As at 1 January and 31 December	368,617	368,617

Deferred income taxes are calculated on all temporary differences under the liability method and are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled based on tax rate (and tax laws) that have been enacted by reporting date. The principal tax rate used is 35% (2022: 35%), with the exception of deferred taxation on the fair valuation of non depreciable property which is computed on the basis applicable to disposals of immovable property, that is, tax effect of 8% (2022: 8%) of the transfer value.

The balance as at 31 December 2023 represents:

2023 €	2022 €
(1,953,503) 1,849 267	(1,953,503) 2,223 (41)
(1,951,387)	(1,951,321)
	€ (1,953,503) 1,849 267

17. Issued capital

Authorised:	2023 €	2022 €
214,650 Ordinary shares of €2.329373 each	500,000	500,000
	2023 €	2022 €
Issued and fully paid-up: 214,650 Ordinary shares of €2.329373 each	500,000	500,000

Notes to the Financial Statements for the year ended 31 December 2023

18. Other reserve

	2023 €	2022 €
As at 1 January Transfer of unrealised fair value gain, net of tax	7,762,004 -	7,572,675 189,329
As at 31 December	7,762,004	7,762,004

The other reserve represents changes in fair value of investment property, net of deferred tax movements, which are unrealised at the reporting date. These amounts are transferred from retained earnings to this reserve since these gains are not considered by the directors to be available for distribution. Upon disposal of the respective investment property, realised fair value gains are transferred to the retained earnings. The unrealised gain reserve is a non-distributable reserve.

19. Cash and cash equivalents

The cash and cash equivalents comprise the following statement of financial position amounts:

2023	2022
€	€
117,486	391,778
-	(1,690)
(5,890)	-
111,596	390,088
	(5,890)

20. Financial risk management objectives and policies

The Company's principal financial assets comprise loans and receivables, trade and other receivables and cash and cash equivalents. Its principal financial liabilities comprise trade and other payables and borrowings.

The Company is exposed to market risk, credit risk, liquidity risk and fair value risk.

The Board of Directors reviews and agrees policies for managing each of these risks which are summarised below.

Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market prices comprise four types of risk: interest rate risk, currency risk, commodity price risk and other price risk. Financial instruments affected by market risk include borrowings. The Company is only exposed to interest rate risk.

Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Except as disclosed in note 11, the Company's borrowings are non-interest bearing. Borrowings issued at fixed rates consist primarily of bank loans and loan from parent undertaking.

Notes to the Financial Statements for the year ended 31 December 2023

Credit risk

Credit risk is the risk that a counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities (primarily trade receivables).

Customer credit risk is managed by the Company's management subject to the Company's established policy, procedures and control relating to customer credit risk management. Credit quality of a customer is assessed based on each individual's credit limits. Outstanding customer receivables are regularly monitored. An impairment analysis is performed at the reporting date on an individual basis. The Company exercises a prudent credit control policy, and accordingly, it is not subject to any significant exposure or concentration of credit risk.

The Company banks only with local financial institutions of high quality standard or rating. The Company's operations are principally carried out in Malta and all of the Company's revenue originate from clients based in Malta.

Trade receivables

The following table details the risk profile of trade receivables based on the Company's provision matrix in accordance with the simplified approach set out in IFRS 9. As the Company's historical credit loss experience does not show significantly different loss patterns for different customer segments, the provision for loss allowance based on past due status is not further distinguished between the Company's different customer base.

Year ended 31 December 2023

	Receivables		
	Trade receivables	Accrued income	Total
Approach in measuring ECL	General	General

Estimated credit losses	(4,450)	(212)	(4,662)

Notes to the Financial Statements for the year ended 31 December 2023

Other financial assets at amortised cost

Other financial assets at amortised cost include loans to group companies and joint ventures. The estimated credit loss provision for other financial assets at amortised cost as at 31 December 2023 and 2022 is as follows:

	Cash in banks		
	2023	2022	
	€	€	
Estimated gross carrying amount at default	117,486	391,778	
Estimated credit loss	-	(1,690)	

Liquidity risk

The Company is exposed to liquidity risk in relation to meeting future obligations associated with its financial liabilities. Prudent liquidity risk management includes maintaining sufficient cash and committed credit lines to ensure the availability of an adequate amount of funding to meet the Company's obligations.

The table below summarises the maturity profile of the company's financial liablities based on contractual undiscounted payments.

Year ended 31 December 2023

Teal chaca 31 December 2020	,			
	> 1 year	1 to 5 years	> 5 years	Total

	2,104,807	7,685,263	712,841	10,502,911

Fair value risk

As at 31 December 2023 and 2022, the carrying amounts of trade and other receivables, cash and cash equivalents, trade and other payables reflected in the financial statements are reasonable estimates of fair value in view of the nature of these instruments or the relatively short period of time between the origination of the instruments and their expected realisation. The fair value of loans and receivables and non-current borrowings are not materially different from their carrying amounts in the statement of financial position.

Notes to the Financial Statements for the year ended 31 December 2023

The Company used the following hierarchy for determining and disclosing the fair value of investment property by valuation technique:

Level 1: quoted (unadjusted) process in active markets for identical assets or liabilities;

Level 2: other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly; and

Level 3: techniques which use inputs which have a significant effect on the recorded fair value that are not based on observable market data.

Fair value measurement hierarchy:

	Level 1 €	Level 2 €	Level 3 €	Total €
As at 31 December 2023 Investment property		1,236,200	27,101,561	28,337,761
As at 31 December 2022 Investment property	<u>-</u>	1,236,200	26,990,000	28,226,200

Capital Risk management

Capital includes the equity attributable to the shareholders of the Company.

The primary objective of the Company's capital management is to ensure that it maintains healthy capital ratios in order to support its business and maximise shareholder value.

The Company manages its capital structure and makes adjustments to it in light of changes in economic conditions. To maintain or adjust the capital structure, the Company may adjust the dividend payment to the shareholder, return capital to the shareholder or issue new shares.

No changes were made in the objectives, policies or processes for managing capital during the years ended 31 December 2023 and 2022.

	2023	2022
	€	€
Interest-bearing loans and other borrowings (note 11)	7,913,840	8,978,104
Trade and other payables (note 15)	1,038,519	969,058
